

DETAILS

The AQU BIG 25 M portable cooler is perfect for cooling large work environments or for localized cooling of specific areas or individual machines.

Aquarial portable coolers cool and purify the air in open areas and may also be used outdoors.

### PERFECT FOR

- Medium or large work or commercial environments
- Localized cooling of individual areas of the industrial building, or work islands
- Localized machine cooling
- Cooling of outdoor areas

### Technical characteristics

	u.m.	AQU BIG 25 M
Air flow rate	m <sup>3</sup> /h	25.000
Cooled area	mq	400-500
Power	w	900
Noise	db	60
Water tank	l	216
Water consumption	l/h	20-30
Net/operating weight	kg	90/306
Dimension	cm	118x70x165
Phases	-	1
Speed	-	3
Ioniser	-	no
Panel control	-	manual
Remote control	-	no
Pump protection	-	yes
Overload protection	-	yes
Draining	type	manual
Pre-cooling	-	no
Tank filling	type	manual & auto

### GENERAL FEATURES

The AQU BIG 25 M portable cooler is perfect for cooling medium and large work environments or for localized cooling of specific areas or individual machines. Especially in summer, the high temperature that is produced in work environments creates an unbearable microclimate for the machinery and the people operating them, negatively influencing performance in terms of productivity and safety.

The AQU BIG 25 M portable cooler cools surface areas up to 500 m<sup>2</sup> with 900 W of power, a maximum noise level of 60 db, and water consumption of 20-30 litres per hour. It has a manual control panel, manual water draining, and manual or automatic water filling system.

Unlike traditional air conditioning systems with high installation costs and energy consumption, which are not efficient in large areas and in areas with doors and windows open, Aquarial portable coolers cool and purify the air in open areas and may even be used outside.

The AQU BIG 25 M portable cooler is the efficient, ecological, and economical solution for cooling medium or large areas or for localized cooling of certain areas of the industrial building, work islands, or individual machines. It is ready for use, there is no need for installation, and it is easily transported and positioned.

Economical and ecological, Aquarial portable coolers cool and purify the air using the natural principle of evaporation – hot air is extracted, passes through wet filters that lower the temperature, and returns to the environment cooled and

purified.

### APPLICATION SECTORS

- Metalworking
- Plastic and Rubber
- Food
- Textile
- Carpentry
- Chemical and Pharmaceutical
- Electronics
- Logistics and Packaging
- Laundries and Dyeworks
- Printing Houses
- Restaurants, Pizzerias, Bars
- Tensile structures for events
- Sports facilities
- Agriculture and Livestock
